InfoCar

For used-car dealers in Chile

The most to pay for a used car, and what it will cost to fix, in under two minutes.

Caro · Cuero · León · Marín · Parraud · Ramírez S. · Ramírez V.

Professor: Claudia Scherman B.

Buying used is a gamble

Dealers decide, car by car, what to pay and what repairs will cost, without a reliable price or a mechanic on site: a classic "market for lemons" (Akerlof, 1970).

2.0–68.9M

CLP asking prices for the same model, the Ford F-150, in 2025
Emol, 2026

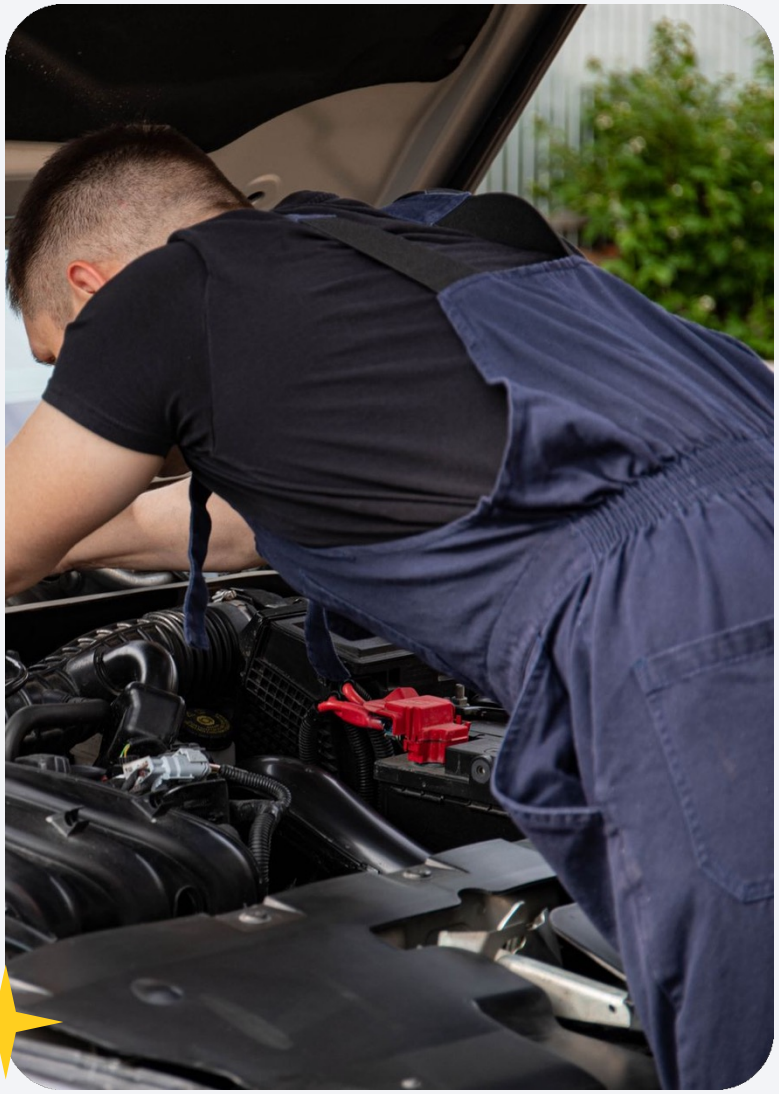

52 days

average insured repair in Chile, from claim to pickup; buying blind eats the margin
Autocosmos, 2026

41,700+

vehicle-fraud court cases, Jan–Sep 2025, up 64% on the year before
Melelli Viveros, 2026

Today: portals, spreadsheets and the owner's eye

What a dealer pays to know

Every way to check a car today is slow, expensive, or blind to its physical condition.

Pre-purchase inspection

82–86k

CLP per car

1–3 hours. A mechanic checks the car in person.

Serviteca CyT, Ojo Mecánico

Chileautos home inspection

59,990

CLP per car + travel

130+ points, digital report in about an hour.

Chileautos

Autofact report

6–9k

CLP per car (5,990–8,990)

Price and legal history. Nothing on physical condition.

Autofact

Portals + spreadsheets

Hours

of staff time per car

Each salesperson prices the same car differently.

InfoCar Internal Analysis

Working price hypothesis: about CLP 60,000 a month, less than one inspection

Sources: Serviteca CyT (n.d.), Ojo Mecánico (n.d.), Chileautos (n.d.), Autofact (n.d.); prices checked 11 Oct 2026.

Your own mechanic in your pocket

01 **Snap the car**
Guided photos, plus make, model, year, mileage and asking price.

02 **InfoCar does the maths**
Market comparables + the model's typical faults (validated by mechanics) + damage detected in the photos.

03 **Get a clear call**
Maximum purchase price, repair-cost range, and Buy / Negotiate / Pass.

Max price = market value − repairs − risk margin

A pre-screen, not a certificate: photos can't see inside the engine or gearbox. The price comes from a regression, not from the language model.

Photo: Pexels.

Why not just ask ChatGPT?

A general chatbot has no current Chilean listings, and when it reads car damage from photos it often invents things.

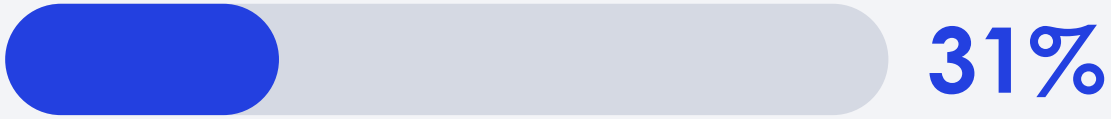

Vehicle damage reports with hallucinations

General vision model, image only

78%

Same model anchored to a dedicated damage-segmentation model

31%

100 human-checked reports (Hogale et al., 2026)

What InfoCar adds

- ✓ Up-to-date Chilean market data
- ✓ Vision models built for car damage
- ✓ Ranges with a confidence level
- ✓ Traceable estimates and human review

Accuracy is the top AI barrier for 74% of US dealers (Cox Automotive, 2025): sell verifiable accuracy, not "AI"

Sources: Hogale et al. (2026), arXiv 2608.02470; Cox Automotive (2025).

Meet Camilo, our customer

Illustrative persona

~7 cars bought a month | Team of ~6 | Greater Santiago

No mechanic on payroll | Owner decides and pays

"I know a good car when I see one, but I can't open every hood."

✓ Adopts if

- Max price and repair range in under two minutes, on a phone
- Estimates match real workshop bills in the first trial
- Costs less than one mistake a quarter

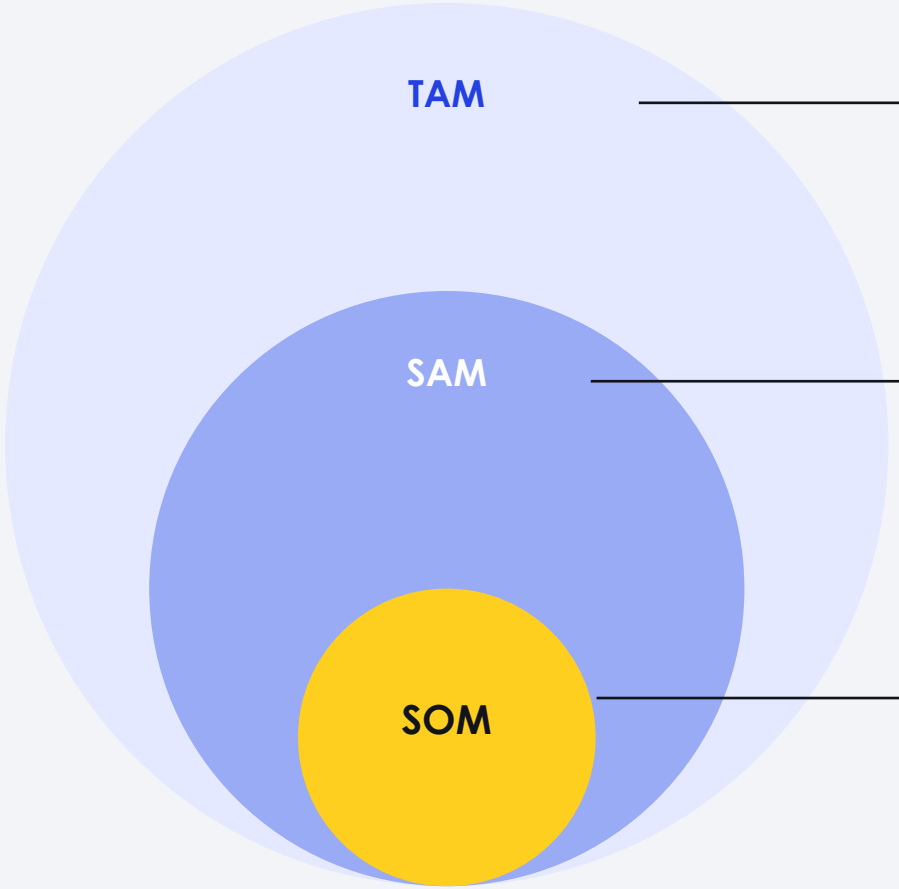

✕ Rejects if

- Long setup or staff training
- Estimates far off, even once or twice
- Costs as much as the dealer software they already pay for

Composite profile built on SII 2024 sales brackets; habits and quote are hypotheses to test in interviews. Photo: Pexels.

Big market, small niche to start

Bottom-up sizing: number of companies × yearly subscription, base case.

4,325 companies
CLP 3,646M a year · every company in SII activity 451 (a ceiling)

1,109 dealers
CLP 1,061M a year · small and medium companies

56 dealers
CLP 66M a year · 10% of the 557 core dealers within 3 years

1.06M
used-car transfers in 2025, up 5.8%

16.2%
bought by companies, about 14,300 a month

58%
of transfers happen in Santiago

The niche is small: we need more revenue per dealer, paid reports, or new markets.

Sources: SII company statistics, activity 451, commercial year 2024; CAVEM (2026). Prices and penetration are hypotheses (CLP 60k–150k a month; 10% of core).

Where InfoCar plays

Valuing cars is crowded and cheap. Pricing in condition, before the dealer even asks, is not.

Proactive · price only

- Ofertautos

Proactive · price + condition

- **InfoCar**

Empty today: our target position

Reactive · price only

- AutoGest
- Autopress
- GoAuto
- OmniMotora
- Rolav
- Spreadsheets

Reactive · price + condition

- Rodar (OBD2)
- Inspections
- ChatGPT

Top threats

1. **Rodar**
   Same buyer and job. Max price, margin and repair range, read from an OBD2 device. Early access.
2. **Autofact Autopress**
   Used-car prices by plate for 6 UF a month, sold to dealers it already serves for transfers.
3. **AutoGest**
   AI appraiser at CLP 59,990 a month; claims 200+ dealers.

Our edge: no hardware. Photos work on any car, even one seen in a listing.

Sources: competitor websites checked 11 Oct 2026 (Rodar, Autofact, AutoGest, GoAuto, Ofertautos, OmniMotora, Rolav).

Seven founders, one roadmap

BC	VR	JP	SR	DC	GM	ML
CEO	CTO	CFO	COO	Data and Pricing	Product	Tech Ops
Bruno Caro	**Vicente Ramírez**	**Joaquín Parraud**	**Sebastián Ramírez**	**Daniel Cuero**	**Gabriel Marín**	**Moisés León**
Sales and growth	Vision and platform	Plans and funding	Operations	Pricing engine	Capture and report	Faults and validation

Final-year Industrial Engineering students at UDD, part-time and unpaid. External network: mechanics, legal advisor, accountant, UDD mentors.

NOW · 0–12 months — **We are here**

Validate problem and accuracy: 10–15 dealer interviews, mechanic-made prototype reports, 10 free pilots in Santiago.

NEXT · 12–36 months

B2B recurring revenue: Basic and Pro plans with a 14-day trial; break-even at 31 dealers.

LATER · 36+ months

Growth options, each tested first: workshop referrals, insurers, live video inspection, other countries.

Source: InfoCar Internal Analysis, sections 5 and 6. Roles follow each founder's title.

What we need to learn

INFORMATION NEED

How does uncertainty about a car's condition and repair costs shape perceived value and the price set?

OVERALL OBJECTIVE

To understand how technical and economic certainty is valued when determining the transactional value of used vehicles.

	SPECIFIC OBJECTIVE	HOW	FEEDS
1	**Identify** the physical and aesthetic attributes most valued when weighing a car's condition.	Interviews + ranking	**Detection catalogue**
2	**Analyze** how anticipating reconditioning costs affects the purchase offer.	Price simulation	**Pricing rules**
3	**Evaluate** the distrust barriers that affect decisions under information asymmetry.	Thematic analysis	**Confidence scoring**
4	**Describe** the time bottlenecks of conventional inspection and repair costing.	Journey maps	**B2B sales pitch**
5	**Compare** willingness to pay for automated condition checks vs. inspections and history reports.	Van Westendorp	**Subscription price**

Source: Workshop 2 deliverable, Strategic Marketing (UDD). The two assumptions that move InfoCar's result most: price per customer and dealer adoption.

Universidad del Desarrollo

Next steps

Turn hypotheses into evidence before building anything.

1. **Talk to 10–15 dealers**
   Last car bought, last surprise repair, tools they pay for, and whether CLP 60,000 a month is worth it.

2. **Secure market data**
   Chileautos bans scraping: negotiate a data licence or partnership with Chileautos, Yapo or Remates Reyco.

3. **Track Rodar, test the price**
   Join Rodar's waitlist as a dealer; test Basic and Pro plans against AutoGest's CLP 59,990 anchor.

From 1 Dec 2026, Ley 21.719 applies: we store vehicle data only, never seller names or phone numbers.
